

MINDMAPS

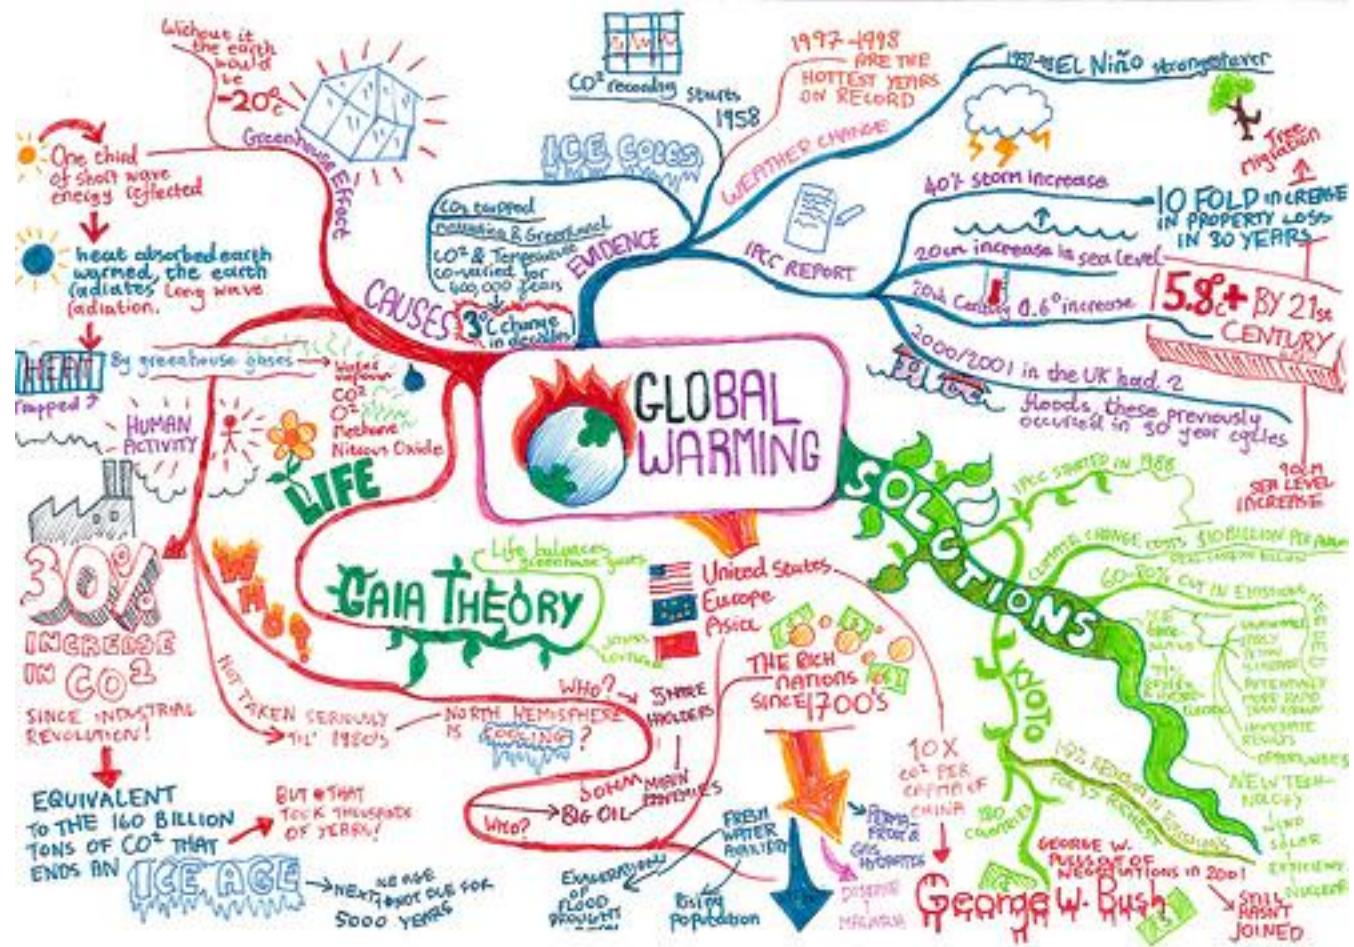

A visual approach to revision

WHY MINDMAPS?

- It helps you to organise information into related groups and then develop it by adding detail from additional stems
- Use of colour and added visuals (sketches, logos, characters etc) can help you remember information
- Trains us to use of the analytical left brain to search for key-words and ideas
- Mindmaps can be as basic or as decorative and details as you like...

BASIC EXAMPLE

ADVANCED EXAMPLE - USING IMAGES AND COLOUR
