

Solutions for the Planet visits Longfield Academy

On Monday 8th January Longfield Academy were visited by Solutions for the Planet. This organisation goes into secondary schools and helps the students learn about sustainability and entrepreneurship, with the use of science, technology, engineering and maths. Our year 7 and 8 students worked with a number of year 6 children from all different primary schools.

“Solutions for the planet was an amazing experience, it really taught us about business and entrepreneurship through the subject of science.”

“When the organisation goes to your school, you do the big ideas day which is a day when you work in groups to try and create a solution for the world's problems.”

Solutions for the planet is a great way of learning about our world and its problems.

Overall solutions for the planet was a very fun experience where we learnt a lot of interesting facts.
